

A112C Puck light

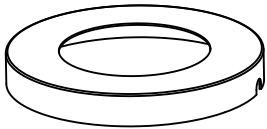

1. Important Safety Instructions

- 1. For indoor use only.
- 2. Regularly inspect the power cord, transformer, and all other components for damage. If any part is damaged, the product should not be used.
- 3. When installing or using this luminaire, strictly adhere to the requirements outlined in this manual. Retain this manual for future reference.
- 4. The light source of this product is a non-replaceable light-emitting diode (LED).
- 5. Do not install the luminaire in locations where water droplets may occur.

2. Product Accessories

Embedded face ring

Surface-mounted face ring

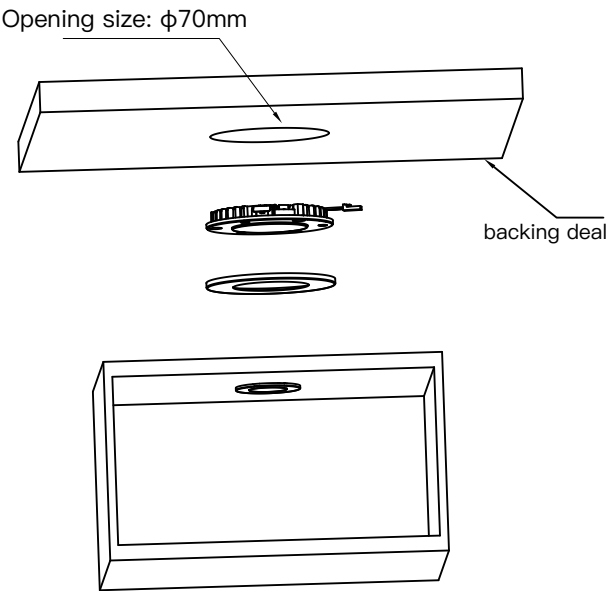

KA3\*14mm screw\*4pcs

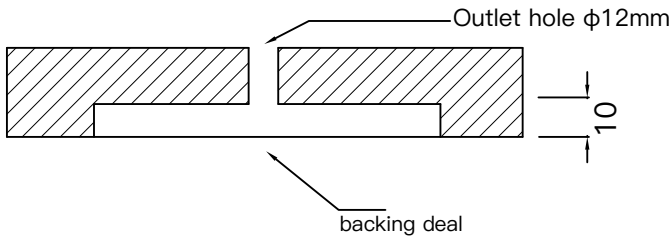

C2310 wire casing

3. Installation Diagram

Embedded installation method 1: Open a through hole  $\phi 70\text{mm}$

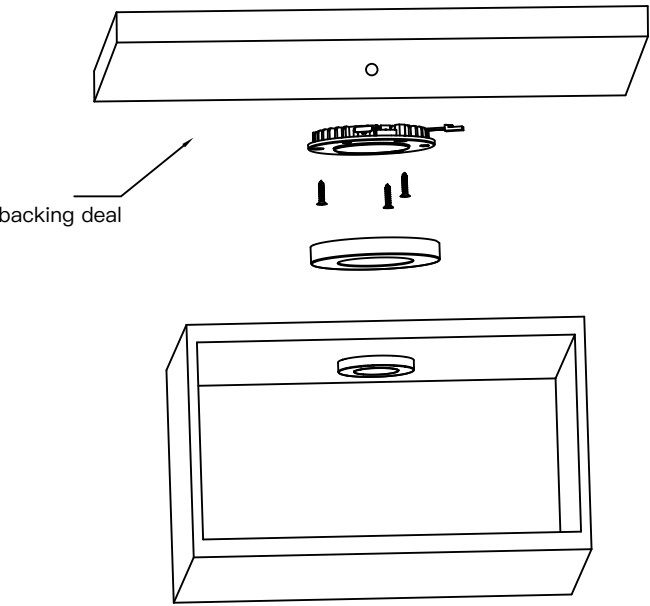

Embedded installation method 2: Open blind hole  $\phi 70 \times 12\text{mm}$

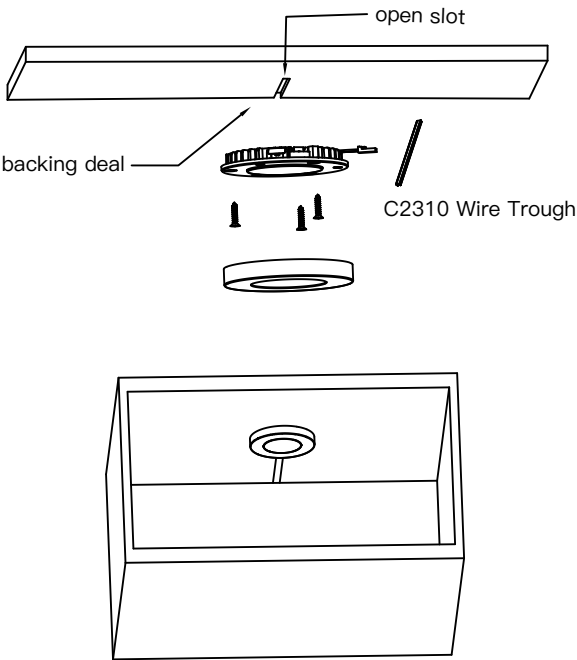

Surface-mounted method 1:

- 1. Drill a  $\phi 10\text{mm}$  wire hole at the luminaire installation position;
- 2. Use KA3\*14mm screws to fix the luminaire onto the wooden board surface;
- 3. Attach the surface-mounted ring onto the luminaire surface by adsorption.

Surface-mounted method 1:

- 1. Cut a wiring channel on the shelf board (channel width 8mm \* depth 6mm – C2310 wire channel)
- 2. Secure the luminaire to the wooden surface using KA3\*14mm screws;
- 3. Attach the surface-mounted ring to the luminaire surface by adsorption.
