4. Installation Steps

5. Installation Notes

1. Lamp installation and maintenance should be performed by professionals;
2. Regularly inspect the lamp wires, transformers, and all other components for damage. If any part is damaged, discontinue use immediately;
3. During installation and use of this product, strictly adhere to the requirements outlined in this manual and retain it for future reference;
4. The light source of this product is a non-replaceable light-emitting diode (LED);
5. Do not install the lamp in environments with high temperature, high humidity, or excessive dust;
6. Handle with care to avoid damaging the product.
